Panelled with walnut wood in the corners

## ~ A Quick-Dry and Antibacterial Cutting Board ~

This paulownia wood cutting board has the following 2 features. First, it is not only made under Food Sanitation Act, but also coated with the safe finish extracted from persimmons. Second, highly water repellent quality makes it easy-clean. In brief, this is such a quick-dry, antibacterial and lightweight cutting board!

It was thought that the cutting board made of 100% natural wood gradually becomes warped or bowed. However, with the panelled walnut wood in the corners, the cutting board can be used for a long time. What's more the paulownia wood is rich in pliability and elasticity, so it wouldn't dull the knives. One side of the cutting board can be served as a plate just like a dining table decor.

Though the plastic cutting board is popular now, the sound of rhythmical chopping from wooden one, is one of the childhood memories for lots of Japanese.

As time goes by, the wooden cutting board would get scratches and stains. To solve this problem, our company offer repairing service to make it good as new. Hence, this cutting board can be used for generations to come without any problem. With such a super cutting board, the family relationship will be much more closely.
