~ 1mm Thin-Wall Paulownia Wood Rock Glass ~

As a traditional craftsman, specializing in making Kishu paulownia chest of drawer, I have the confidence that my technique surpasses others. Paulownia products are generally viewed as luxuries, far from our daily life. Therefore, I develop the merchandise called "Paulownia Wood Rock Glass" and hope paulownia wood products can be much closer to our daily life.

Paulownia tree has been thought to be a kind of auspicious trees since ancient legends. Rumor has it that as Qin Shi Huang, the first emperor of imperial China, was in power, he planted paulownia trees, which Phoenix only land on, in the palace to attract the auspicious Phoenix.

It is a rock glass that will right itself when pushed at an angel. Just like Phoenix, which will rebirth again and again, I want to use the paulownia products to bring new life to the market and local communities. With the unique technique and abundant experience, we make the wall merely 1mm. What's more, the rock glass weighs merely 23.4g, lighter than 6 JP10 yens. You can enjoy this rock glass with Sake or hot tea. Finally, we hope you can also use this rock glass in your daily life.
